

Arbor Care 15-8-4

Arbor Care 15-8-4 with micros is made from only the highest quality N-P-K sources and micros. Arbor Care provides a continuous steady source of slow release nitrogen from urea-triazone along with soluble, non-chloride potassium. The N release period, when used for deep root injection, extends 2 to 4 months depending on the soil and climate conditions. There is no danger of phytotoxicity. Arbor Care is a TRUE SOLUTION, ideal for foliar spray application and soil injection for trees and ornamentals. No special agitation is needed. Arbor Care is compatible with fungicides, herbicides and insecticides and can be mixed and sprayed in one application. Arbor Care has an extremely low salt index.

Tree Care DBH / Soil Injection Method

Lb. Nitrogen per Inch DBH	15-8-4 per 100 Gal of Water
1 / 18 (0.05 lb)	1.5 Gallons
1 / 12 (0.08 lb)	2.5 Gallons
1 / 6 (0.16 lb)	5 Gallons
Apply 2 gallons of tank mix per inch diameter at breast height (DBH). Always measure diameter at 4 ½ feet above ground level	

Application Rate 2 - 3 gal per 1,000 FT²

Tank Size	Quantity of 15-8-4 Per 1,000 FT ²	
	½ lb N	1 lb N
100 gal	1 gal	2 gal
150 gal	1.5 gal	3 gal
300 gal	3 gal	6 gal
600 gal	6 gal	12 gal
1000 gal	10 gal	20 gal

For ground area method, measure below drip line of tree. Rates of ½ - 2 lbs of nitrogen are recommended. Evergreens usually require slightly higher nitrogen than deciduous trees

Nursery & Landscape Areas
