

# Starter Plus Bloomtastic 8-32-5

**Starter Plus 8-32-5** with 50% SRN is a high phosphorus solution, ideal for newly seeded areas. Phosphorus from ammonium polyphosphate is more soluble under cool conditions, and potassium acetate provides the most readily available form of K, assuring quick uptake by new seedlings. Starter Plus is ideal for foliar spray applications, hydroseeding and as a soil drench. It is non-clogging and non-abrasive to equipment. It is compatible with fungicides, herbicides, and insecticides and can be mixed and sprayed in one application.

-  **For Newly Seeded Areas**
-  **Compatible With Technical Materials**
-  **Promotes Rooting**
-  **No Agitation Needed**
-  **Plus Micronutrients**

Produced by:
