

Magnesium 3%

Magnesium 3% is an essential component of the structure of chlorophyll, critical for capturing the solar energy needed to build sugars. Magnesium 3% provides magnesium in a soluble form, making it readily available for both soil and foliar application. Magnesium 3% is ideal for mixing with pH acid sensitive products. It is not affected by other nutrients or technical grade materials. Mg^2 can be held on soil exchange sites, becoming available for plant uptake as it moves into equilibrium with the soil solution. Magnesium 3% is compatible with all Growth Products professional fertilizers. Be sure to read all mix instructions prior to tank mix solutions.

- Assists in Chlorophyll Production
- For Foliar and Root Application
- For Turf and Ornamentals
- Natural Organic Chelating Agent

MAGNESIUM 3%

GUARANTEED ANALYSIS:

Total Magnesium (Mg)..... 3%
3% Water Soluble Magnesium (Mg)
Derived From: Magnesium Sulfate, Magnesium Glucoheptonate.

Foliar Turf Applications

Application	Rate / 1,000 FT ² (100 m ²)	Frequency
All Types of Cool Season and Warm Season Grasses	2 - 6 oz (127 - 159 ml)	Apply 3 to 5 times during growing season or as needed to maintain color
Bermudagrass	4 - 8 oz (159-177 ml)
