

SOD AND SEED ESTABLISHMENT PROGRAM

Using Growth Products Fast Start Sod Program will speed up establishment time and accelerate harvest programs for sod managers. The Fast Start Sod program will quickly establish the

root zone and provide all of the essential nutrients needed for a strong plant faster. Begin the program at the time of seeding, plugging or sprigging.

- Speeds Up Production Process
- Cost Effective
- Stimulate Tillering
- Improve Color

ESTABLISHMENT PROGRAM

Page	Products	Rate per acre	Interval	Comments
24	Starter Plus Bloomtastic 8-32-5	6 gallons	At time of seeding, plugging, sprigging. Apply again in 2 weeks	High Phosphorous application for initial establishment and growth
WITH				
12	Hydro Max	4 gallons	At time of seeding, plugging, sprigging. Apply every 21-30 days	• Increase water and fertilizer penetration • Reduces Surface Tension of Sprays • Loosens Compacted Soil • Helps to Leach Salts
OR				
10	Carb Care	1 gallon	At time of seeding, plugging, sprigging. Apply again every 14-21 days	• Supports Soil Microbes • Enhances Nutrient Uptake • Manage Soil Moisture • Penetrates Hard to Wet Soils

GROWTH AND PRODUCTION PROGRAM

Page	Products	Rate per acre	Interval	Comments
19	Nitro 28 28-0-0	3.5 gallons for 1/4lb Nitrogen per 1000 ft ²	Apply every 14-21 days or as needed for continued growth	• Does Not Leach or Volatize • Stimulates soil microbes with carbon • Dual efficiency foliar/root uptake
WITH				
16	MicroTech CT 4-0-0	1 gallon	21-30 days	• Improve chlorophyll & photosynthesis • Organic enhancers for fast nutrient uptake
ADD				
	Companion Maxx 2-0-1	1.5 gallons	Monthly	• Adds beneficial Bacillus subtilis to the Rhizosphere to revitalize the soil • Improves nutrient uptake
