

Micrel Total 5-0-0

- For Turf, Tree Care, Nursery & Greenhouse
- Foliar Spray to Correct Chlorosis
- Improve Color
- Six Chelated Micros
- Foliar & Root Absorbed

Micrel Total 5-0-0 is a true solution containing six chelated micronutrients used to correct deficiencies (chlorosis) in turf, trees, ornamentals and bedding plants. Micrel Total is completely miscible in water. The unique citrate / nitrogen chelate bond eliminates any flush growth or budding. All nutrients are available either by foliar or root feeding, and can be applied throughout the growing season with no concern of phytotoxicity. Micrel Total aids in tolerance to disease, winter desiccation and tolerance to stress. Chlorotic plants will respond within 48 hours with a deeper, healthier green. Bentgrass turf will respond within 24 hours and maintain a residual green for 2 to 3 weeks. Micrel Total can be sprayed along with herbicide applications to reduce yellowing. Micrel Total is compatible with other technical materials.
